

MailSafe™

The easiest way to secure your mail!

The United States Postal Service is one of the most efficient and cost-effective ways to deliver printed documents. However, millions of commercial businesses and Government agencies send personal and confidential information through the mail with little or no security protection.

MailSafe™ from Rifkin offers users a simple, low-cost option for protecting the integrity of regular mail deliveries. The patented MailSafe™ pouch is constructed of heavy-duty Arco 600 fabric and has a built-in Keyless Security™ lock. Users simply place desired items inside the bag, zip the bag shut and insert a uniquely numbered seal in the lock. If the recipient notices a broken or different numbered seal, the contents of the bag have been compromised.

The 13" x 16" MailSafe™ pouch is available in multiple colors and can be custom embroidered for quick department or division identification.
