

Wolper Partners With Copyright Clearance Center and incorporates CCC's Rightsconnect™ into WOLPERweb®

Leading Subscription Services Company Enhances Customer Service Through One-Click Access to Copyright Permissions

Easton, PA – June 10, 2010 Wolper Subscription Services, a leader in the information management industry for the past 35 years, and Copyright Clearance Center (CCC), a not-for-profit organization that is the world's leading provider of copyright licensing solutions, announced a partnership that will integrate CCC's rich rights licensing database with WOLPERweb® robust functionality for ordering periodicals, books and electronic content. Users of WOLPERweb® are able to search, price and obtain copyright permission at the point of purchase or renewal with one-click access.

Wolper offers secure, online, 24/7/365 access for searching, ordering and managing more than 300,000 periodicals and books via WOLPERweb®. Wolper was the first subscription agency to bring online management tools and technology to its customers and remains the industry leader in providing robust, comprehensive and effective software tools. The Rightsconnect™ feature is the latest enhancement in this flexible, time-saving solution.

Rightsconnect™ Permissions Direct is an OpenURL-based™ service that provides users with online access to a complete summary of the copyright permissions available for the specified title. Users can transparently access and obtain licenses for various types of use: photocopying, digital distribution or use, re-publication in print or digital formats, classroom handouts, and print or electronic course packs.

"This is a strategic alliance that enables our customers to incorporate a streamlined copyright permissions solution into their procurement work processes while mitigating legal risk of copyright infringement" said Susan Wolper, Wolper Subscription Services President and CEO. "CCC's Rightsconnect™ allows us to provide a simple and seamless integration of world-class systems to deliver point-of-order permissions for intellectual works. We are now in an ideal position to continue providing unique value to desktop users and librarians in corporations, academic institutions, medical and healthcare facilities, governmental agencies, public libraries and not-for-profit entities."

"By embedding CCC's copyright permission tools directly into WOLPERweb® we are making it easier for content purchasers to manage their copyright compliance efforts. We are excited to bring this new value-added solution to WOLPER's extensive customer base," said Miles McNamee, CCC VP, Licensing and Business Development.

About Wolper Subscription Services

Wolper is a one-stop information management resource and a certified diversity supplier - the only 100% woman-owned business in the field. For 35 years, the company has been providing service and savings to corporate, government, public and academic customers. Wolper's "high tech, high touch"™ approach delivers the perfect combination of next-generation technology and time-proven, personalized service. Besides serials, Wolper also handles books, site licenses, ERM and other information solutions, both traditional and innovative. Wolper is Ariba certified, Fedlink approved, and a member of the Association of Subscription Agents and Intermediaries, Special Libraries Association and American Library Association, among others.
