

Save Time, Money and the Environment

As transportation and fuel expenses hit record highs, executives struggle to find innovative ways to increase efficiencies and lower costs. One often overlooked initiative that has delivered significant bottom line return is the consolidation of inter-office and inter-branch mail delivery.

On a daily basis, our nation's largest commercial, industrial and government agencies generate, handle and transport millions of pieces of mail and internal correspondence. To help streamline the delivery and handling process, A. Rifkin Co. offers a full line of reusable Trans-Sac® mail pouches that are more economical and efficient when compared to standard inter-office paper envelopes.

Rifkin Trans-Sacs® are manufactured from lightweight, water resistant fabric that can withstand hundreds of round-trip mail deliveries. The bags are available in seven standard sizes, a wide range of colors and can be ordered with custom imprinting. By consolidating mail and using color-coded department or branch location bags, Trans-Sacs® allow companies to reduce postage expense as well as increase the sorting speed and delivery efficiency of inter-office and inter-department mail.

Rifkin's reusable mail pouches are approved for either USPS or courier delivery service. A built-in framed window accommodates a reversible address tag for fast return to your centralized mail room.
