

FOR IMMEDIATE RELEASE

Inmagic Builds Upon Successful Library Automation System with Latest *Genie* Release

Upgrade enhances serials features and configurability for improved workflow and administration

WOBURN, Mass.—March 30, 2009—[Inmagic](#) today released Inmagic® [Genie 3.3](#), a component of the Inmagic® *DB/Text Library Suite*, the company's popular Web-based Integrated Library System (ILS) platform. *Genie 3.3* bolsters the product's serials management and configurability capabilities, and is available to all *Genie* customers on active maintenance.

The new serials functionality enhances tools such as arrival date prediction, routing lists, and workflow. In addition, *Genie 3.3* introduces easier configurability options, with updates to functions such as report-driven batch e-mail and alternate search syntax. These updates will ease library administration and improve [508 compliance](#), a Federal regulation for making electronic and information technology accessible to the disabled.

"The needs of special library professionals are evolving, and Inmagic continues to evolve with them," says [Phil Green](#), CTO of Inmagic. "We will leave no librarian behind. *Genie 3.3* is a direct result of customer demand, and demonstrates our 25+-year commitment to keeping special librarians and their organizations at the forefront of automation and library technologies."

Genie is also the cornerstone of Inmagic's [DB/Text Library Suite](#), the company's Web-based integrated library systems management tool. *DB/Text Library Suite* is comprised of three of Inmagic's industry-leading library and special collections management technologies:

- [Genie](#) is a Web-based ILS that manages and provides timely, relevant access to traditional and non-traditional library materials. The platform is perfectly suited for single or multi-site libraries that provide Web-based access to a single catalog covering multiple collections.
- [DB/Text Works](#) is the foundation and textbase engine of *DB/Text Library Suite*. A specialized database and text retrieval system, *DB/Text Works* can efficiently organize nearly any type of digital information—resulting in a central knowledge repository that's accessible to all constituents.
- [DB/Text Web Publisher Pro](#) is *DB/Text Library Suite*'s Web publishing system. It allows users a single platform for information publishing needs, without requiring knowledge of HTML, XML, or other programming technology.

Genie has been embraced by over 300 organizations worldwide, including [California Child Welfare Resource Library](#), [Womens' Health Victoria](#), [Dreyfus](#), [Holland & Knight LLP](#), [Jones & Stokes](#) and thousands more.

Genie 3.3 will be made available to all maintenance-paying customers through a maintenance notification.

ABOUT INMAGIC, INC.

Inmagic, Inc. has been the industry leader in knowledge management and library automation applications for over 25 years. Today, Inmagic is at the forefront of the move to new generation knowledge management, creating Social Knowledge Networks that combine top-down, vetted information with bottom-up, social “wisdom of the community” to address critical research and business objectives.
