

MONTel INTRODUCES ePULSE® REMOTE MONITORING SOFTWARE FOR POWERED MOBILE STORAGE SYSTEMS

December 5, 2008

Montel, a pioneer of high-density mobile storage shelving system solutions for office, institutional and industrial applications, today introduced ePulse, its newly remote monitoring and configuration software.

Created to provide additional certainty and safety monitoring after Montel's WIRED™ high-density powered mobile storage system is installed, Montel now offers ePulse. For remote monitoring 24/7, ePulse gives you or Montel the capability to manage settings remotely and monitor WIRED's behavior with assurance. "Montel is very pleased to introduce ePulse, our remote monitoring software for our powered mobile storage systems," explained Jerome Doucet, Vice President Sales & Marketing at Montel. "At Montel, reliability, safety, and security are key elements that we want the end-users to experience while operating our high-density powered mobile storage systems. With ePulse, Montel's engineers have used the latest technology to ensure that our powered mobile storage products are as safe as they are functional and reliable."

For maximum reliability and peace of mind, ePulse allows the Customer, your Montel Authorized Distributor, and/or Montel to monitor WIRED's specific safety and security features, unique configurations, along with a wide array of programmable options.

To help increase productivity, ePulse can proactively identify, notify and solve any installed system potential problem thus providing less downtime.

Addressing today's modern workspace environment storage and filing challenges, ePulse allows the quick reconfiguration of your WIRED settings. Additionally, ePulse:

- Allows pinpointing any potential problem remotely;
- Allows quick diagnostics of the system to maximize your uptime;
- Sends automatic emails of system errors to local certified factory-trained service technicians and Montel;
- Provides constant monitoring 24 hours a day, every day of the year, of your WIRED system.

Montel's ePulse remote monitoring is available with WIRED and the powered QuadraMobile®. One web-based connection links 12 powered storage storage system modules.

About Montel:

Established in 1924, Montel Inc. is the pioneer of high-density mobile shelving storage system solutions in North America. Manufacturer of products for office, institutional and industrial applications, Montel's achievements include some of the most prestigious projects in North America and around the world.
