MLA

2026 MODERN LIBRARY AWARDS

The 2026 Modern Library Awards (MLAs) is proud to announce its review scores from participating companies in this special supplement to Library Products & Services News. The MLAs are an unbiased program recognizing the elite products and services that serve the library industry. Companies provided concise write-ups of their products/services and submitted them for review. These were then sent out to the LibraryWorks readership — librarians in public, academic, K-12, and special libraries — who then submitted their reviews on a 1-10 scoring system. Each judge had to have had experience with the product or service, and each participating company also had to provide four references of library placements to submit their forms. The LibraryWorks staff had no influence on the scoring.

Awards were based on the following scores:
8.5-10.0 Platinum
7.5-8.4 Gold
6.5-7.4 Silver
Highest Overall Scores – Product of the Year and Service of the Year

The 2026 roster of honorees includes:

Product of the Year:
Library Bound Inc. | Proprietary Library Ordering Platform

Service of the Year:
ReThinking Libraries | Consulting Services

Platinum Awards:
3branch | Skware OPAC tables
Biblionix | Apollo ILS/LSP
Biblionix | Artemis ILS

ConverSight.ai Inc | myLIBRO
Today's Business Solutions Inc. | MyPC with EasyBooking & PaperCut for Computer Reservation & Print Management

Congratulations to all the 2026 MLA Honorees!

Library Bound Inc.

PROPRIETARY LIBRARY ORDERING PLATFORM

Library Bound has always taken pride in innovating to offer the best services to our library customers.

The foundation of Library Bound's efficiency and accuracy is our proprietary web application and ordering platform.

We have worked diligently to create input and output efficiencies which have created a marked improvement in material getting to libraries. Customization for processing services are set in the library's profile using pre-defined logic to ensure consistency and accuracy of material processing. Our web application and platform were created based on decades of experience serving Canadian libraries. Our software system was designed to permit us to continually improve how we serve libraries—now and in the future. This robust web application along with the back-end architecture provides efficient solutions to Library Bound's customers and throughout its organization. Preeminent features include:

- A web design that incorporates features requested by customers
- A complete technology stack developed and maintained by Library Bound staff
- In-house development, allowing for continuous and easily deployed updates and improvements, with no reliance on 3rd parties
- Ongoing advancements that implement the latest technologies
- Flawless integration with library interfaces (e.g., Z39.50 and Polaris and Sierra API's)

HEAR FROM THE JUDGES:

" Library Bound's ordering platform sets industry standards. It is efficient and extremely easy to use. They listen to feedback and are continuously adding new features and making improvements. I couldn't do my job without it.

" I work in LBI's platform everyday and it is so easy and intuitive. I am glad it's a big part of my work. Any service questions or troubleshooting is answered almost immediately. There is no other vendor who shows this much care towards their clients. No tech question is stupid and staff are always gentle, kind and patient in their responses to concerns or learning moments. Couldn't recommend them enough! Fantastic vendor!

ReThinking Libraries
CONSULTING SERVICES

![ReThinking Libraries logo]

Engage | Envision | Evolve

ReThinking Libraries provides forward-thinking consulting services that help libraries thrive in a rapidly changing world. We specialize in strategic planning, community needs assessment, and facilities planning—always tailored to each library's unique needs and opportunities. Our national experience provides libraries with customized processes that reflect local needs while incorporating best practices from across the country. This approach combines deep knowledge of public libraries with expertise in leadership, change management, and community engagement. We guide library leadership, boards, staff, and stakeholders through collaborative processes that produce clear, actionable, and inspiring results. Known for our flexibility, responsiveness, and ability to listen, we help libraries build stronger connections with their communities, develop innovative services, create functional and inviting spaces, expand partnerships, and align resources for maximum impact. With a focus on inclusivity, adaptability, and long-term sustainability, ReThinking Libraries balances creativity and practicality to empower libraries to navigate challenges, seize opportunities, and position themselves as vital, future-ready community anchors.

HEAR FROM THE JUDGES:

" Having participated in three previous library assessments and strategic plan developments, I can confidently say that the information and analysis provided by ReThinking Libraries was, by far, the most insightful. This data has been extremely useful in my conversations with board members and elected officials regarding funding levels and performance benchmarks.

" The strategic plan has been a very useful tool for my library and has helped us advance several goals, including our current expansion project, staff reorganization, and sustainability goals. They also continue to check in on our annual progress and have been very flexible in terms of our capacity, both in terms of budget, time, and other resources.

![MLA logo]

Dear Reader,

Welcome to the 2026 Modern Library Awards special edition of LPSN! I hope you'll take advantage of it to learn about the top-notch products and services offered by these respected companies. Our entire LibraryWorks team thanks all of the judges and applicants who put so much time and thought into the forms and the judging process. Everyone's hard work helped us through another busy MLA season.

Congratulations to the following judges who were randomly drawn to win a $25 Amazon gift card: Heather S., Kayleigh H., James G., Vickie F., Jennifer E., Athena H., Laura P., Willie T., Julie F., Ty H., Linda O., and Eric N.

If you are a library worker who's interested in judging products and services that you've personally used for the 2027 Modern Library Awards, let us know. Send an email to Dempsey@LibraryWorks.com with the subject line MLA Judge. Include your name, title, email, and library name. If you have a product or service you'd like to enter next year, please email Sharon@LibraryWorks.com with the subject line 2027 MLA Entries and include your name, title, email, company name, and product/service name(s).

Products that were entered in the 2026 Modern Library Awards are eligible to be entered again in 2027.

If you have comments about the MLAs, email me any time!

Best regards,

Kathy

Kathy Dempsey

ABOUT LIBRARYWORKS

LibraryWorks helps administrators to make informed decisions about library technology, automation and software, collection development and management, facilities and furnishings, staffing, purchasing, and other areas that drive effective strategic planning and day-to-day operations. Our family of resources can enable you to identify best practices, monitor trends, evaluate new products and services, apply for grants and funding, post or find a job, and even enjoy some library humor.

The Modern Library Awards (MLA) and LibraryWorks, Inc. are not responsible for representations made by MLA honorees.

2026 MODERN LIBRARY AWARDS
PLATINUM AWARD

3branch
SKWARE OPAC TABLES

3branch Skware OPAC tables offer an attractive, streamlined, and user-friendly set up at online catalog stations, making life easier for librarians, staff, and visitors alike. Designed with flexibility in mind, each table is fully customizable from finish options and heights to shelf configurations. Whether you need standard seating height, ADA compliant, or elevated counter-height options for standing users, 3branch has it covered.

Thoughtfully designed shelving offers a space for bags, marketing materials, and tech essentials. An integrated wire management leg and grommet keep cables neat and out of sight, while a welded stainless steel or powder-coated steel base delivers long-lasting durability without compromising style.

Whether tucked against a wall, nestled near shelving, or standing in an open floor plan, 3branch OPAC tables stand out for the aesthetically striking design, high practicality, and timelessness.
More information

Biblionix
APOLLO ILS/LSP

The Apollo® ILS/LSP continues to help customers reach new heights. Apollo was designed from the start to be cloud-based in a multi-tenant environment. That's

state-of-the-art architecture. As Marshall Breeding stated, "Apollo stands apart as a public library system delivered by a modern multi-tenant platform…"

Apollo is solely for public libraries. That's a promise we've made to our customers. There are no schools or colleges that use Apollo.

The servers used for Apollo are not shared in any way and all software is managed by Biblionix personnel. This provides for an unusually high degree of security and protection from malware, ransomware, hacking, etc.

Data is backed-up every 30 minutes to different servers.

Groundbreaking capabilities are normal with Apollo, like FlexShare™ ad-hoc resource sharing/consortia and Gabbie® 2-way texting with commands. Then there's Reserve Express®, where patrons subscribe to their favorite authors, media, and series. The most recent addition is Events and Rooms, a scheduling option.

Interested libraries begin their exploration of Apollo with a free trial with all their data, at no cost or commitment. They get to see everything as it will be in a real migration and can still use their current system, unaffected. It's simply the best way to side-step surprises and evaluate a new system.
More information
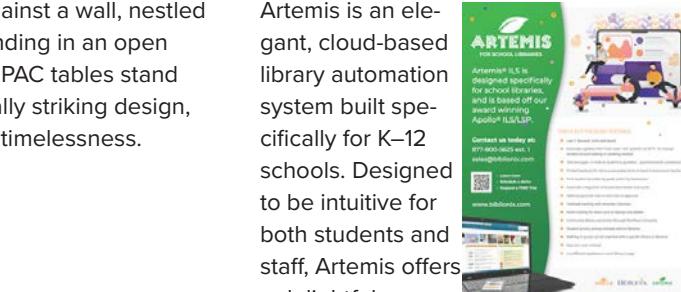

Biblionix
ARTEMIS ILS

Artemis is an elegant, cloud-based library automation system built specifically for K–12 schools. Designed to be intuitive for both students and staff, Artemis offers a delightful user experience while streamlining workflows, cataloging, and circulation. What sets Artemis apart is its zero-clutter interface, fast search results, effortless onboarding, and many available automations.

From smart self-service checkouts to multi-modal reminders via email and text, Artemis simplifies library management so school librarians can focus on students—not systems. Librarians can easily curate

thematic book lists, manage homerooms with ease, and rely on automatic roster integration—meaning no more manual updates to student or teacher accounts. With lightning-fast checkouts and an interface even young students can navigate, Artemis makes the school library experience seamless for everyone.

Fully web-based, Artemis works on any device and requires virtually no local IT support. It's backed by the same renowned support team behind Apollo, trusted by hundreds of public libraries. For schools seeking power without complexity, Artemis is the perfect fit—easy to love, easy to launch, and easy to afford.
More information

Big Dig Data s.r.o.
CELUS
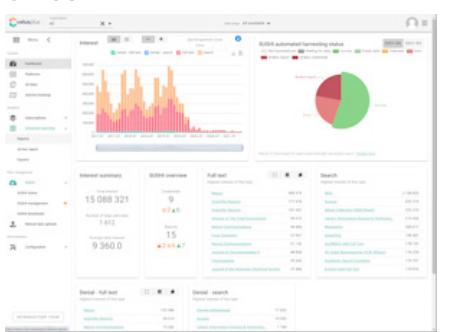

CELUS is an online software for automated harvesting and analysis of COUNTER and non-COUNTER e- resources usage statistics.

It is a powerful yet simple and affordable solution for single libraries, library consortia, and others, including publishers.

As the tagline reads, "CELUS eats SUSHI for breakfast and delivers insights by lunch" - highlighting key values of the tool: instant access to e-resources usage stats across COUNTER and non-COUNTER platforms without any onboarding or complicated setup.

That's what made CELUS popular go-to solution for librarians dealing with e-resources usage statistics.

Among the killer features saving precious time of overwhelmed librarians are:
• Automated data harvesting and effortless SUSHI management
• ACRL IPEDS report in one click
• Cost-per-use analysis
• Identification of overlapping subscriptions

Last but not least, first-time users are always amazed by how fast CELUS is.

We are happy to see that e-resources managers in libraries all over the world can now spend their time on analyzing usage stats and making important acquisition decisions instead of hacking dozens of spreadsheets and XML files to even get meaningful data for analysis.
More information

Bloomsbury Publishing
BLOOMSBURY / ABC-CLIO DATABASES

Bloomsbury / ABC-CLIO Databases are expertly curated subject databases designed to support teaching and learning in social studies. These platforms combine the comprehensive coverage and organization of a textbook with the flexibility of a fully searchable reference database.

Subjects ranging from American History to World Geography are covered in their full scope with articles written by practicing scholars and subject area experts. An inquiry learning framework is supported with the addition of hundreds of primary sources, including illustrations and photographs, newspaper clippings, court documents, letters, narratives, speeches, and archival audio and video footage. Student activities, ready-to-use lectures, and other instructional resources help educators easily integrate database content into their curriculum. Built-in standards alignment and LTI and SSO options make our databases flexible solutions for any learning environment.
Additional highlights include:
• Academic skill-building modules help students develop and refine their reading, writing, and research skills

• Built-in translation, text-to-speech, and audiovisual resources support enhanced accessibility and differentiated learning environments

Embedded search, save, and citation tools to facilitate student research projects.

Brainfuse
BRAINFUSE'S HELPNOW VIRTUAL LEARNING SYSTEM
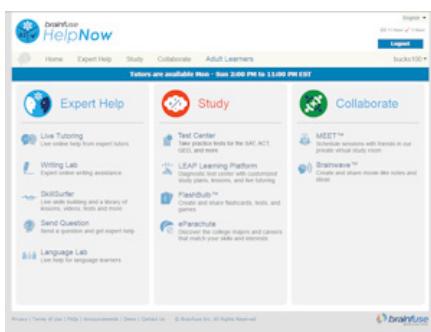

Brainfuse's HelpNow Virtual Learning System is an award-winning online tutoring and study suite which is backed by an industry-leading academic team, and over 4,500 Brainfuse-certified tutors nationwide.

HelpNow offers patrons of all ages state-aligned one-to-one tutoring, intensive writing assistance, targeted skills building, test preparation, and a full line of collaborative learning and self-study tools.
• Field-Tested Tutoring: Brainfuse is in 3,000+ public libraries throughout North America, representing a service population of over 150 million. Our clients include the State Libraries of Virginia, Missouri, New Mexico, Oklahoma, and Iowa, as well as the Los Angeles County Library, the New York Public Library, the Houston Public Library, and the Chicago Public Library.
• Beyond Homework Help: HelpNow provides the most comprehensive range of academic services available among online tutoring platforms.
• High-Quality Tutors: All Brainfuse tutors have 4-year college degrees and undergo a rigorous selection and training process.
• State-Aligned Services: All online tutoring, skills lessons, and practice tests are aligned to state standards.

We are one of the most experienced tutoring companies in North America, having completed over 25 million one-to-one online tutoring sessions since 1999. We are committed to providing quality academic support and continually meeting student needs through innovative features and services. Learn more at www.brainfuse.com

HEAR FROM THE JUDGES:

" Brainfuse's HelpNow continues to be a valuable and well-used resource among our library customers. Feedback from both staff and customers has been overwhelmingly positive, particularly regarding the platform's ease of use and the quality of support provided. One of the standout features of HelpNow is its live tutoring option, which offers real-time assistance that no other homework help or test preparation service currently matches in our suite of digital resources. HelpNow fills an important need for students and lifelong learners by providing accessible, high-quality educational support and unique tools that extend learning opportunities beyond the classroom.

More information

Business Management Systems, Inc.
SNAP SCHEDULE — LIBRARY STAFF SCHEDULING SOFTWARE
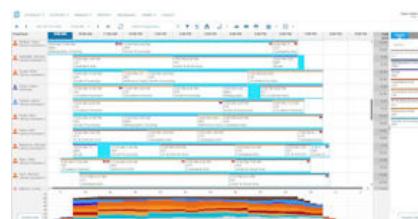

Snap Schedule is the leading library staff scheduling solution, trusted by major library systems to simplify complex workforce management. Built for the unique challenges of libraries, it enables managers to coordinate full-time, part-time, volunteer, and intern staff across multiple branches and service points with precision.

Unlike generic scheduling tools, Snap Schedule provides task and break scheduling, allowing managers to assign not only shifts, but also specific duties (circulation, reference desk, children's programs, IT stations) and compliant break periods within each shift. This ensures every desk and service function is covered while protecting staff well-being.
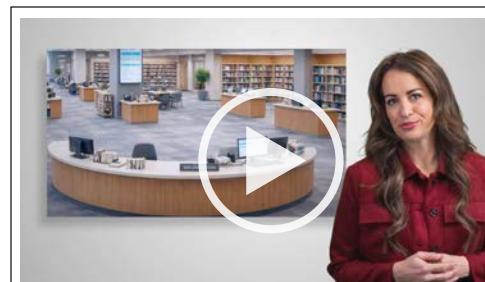

Libraries can create schedules in minutes using drag-and-drop tools or auto-scheduling, with real-time conflict detection, overtime control, and labor rule compliance. Staff gain self-service access to view schedules, request time off, volunteer for open shifts, and swap shifts under policy rules.

By eliminating spreadsheets and scheduling mishaps, Snap Schedule saves staff scheduling time, reduces last-minute coverage gaps, and boosts staff morale through fair scheduling. Previously recognized as a Platinum MLA winner, Snap Schedule continues to set the benchmark for innovation and service excellence in library workforce management.

HEAR FROM THE JUDGES:

" "We began using [Snap Schedule] a couple of years ago, staff seemed to like it better than previous scheduling software."

" "[Snap Schedule] has been amazing [with] direct assistance, working with us on specific enhancements [based on] our suggestions. … They have been easy to contact, responsive, and courteous, and their experts truly understand their product. … [Snap Schedule] is truly valuable and worthwhile."

More information

Clarivate
INN-REACH

INN-Reach transforms resource sharing into a seamless, patron-driven experience that connects communities with millions of additional titles. Through a shared online catalog, patrons, students, and faculty can discover and request materials from partner libraries as easily as placing a local hold. Physical items often arrive in just two days, while electronic resources are delivered almost instantly, broadening access without creating extra work for staff.

Innovative's Direct-to-INN-Reach (D2IR) integration with Alma and Koha extends participation to even more libraries, while integration with Vega Discover ensures borrowed items appear directly in patron accounts for a unified experience.

For libraries, the benefits are immediate: expanded collections, simplified workflows, and increased circulation – all with significantly lower resource-sharing costs. Many libraries report a 70% reduction in shared resource expenses, making INN-Reach both a smarter operational choice and a powerful way to deliver greater value to patrons.

More information

Clarivate
POLARIS

A leading choice for public libraries year after year, and a beloved part of the Innovative family of products, Polaris is a comprehensive ILS designed to simplify operations and enhance the patron experience. The web-based interface gives staff easy access to essential circulation, cataloging, and acquisitions workflows through a browser, empowering them to complete up to 95% of tasks anywhere - in the stacks, at events, or remotely.

Built with input from librarians and technology experts, and focused on all types of libraries, including single site, multi-branch, and consortia, Polaris provides powerful staff tools that drive measurable results. After implementing the Polaris ILS, libraries report 65% less time managing acquisitions, 70% less on catalog maintenance, and 60% faster reporting, freeing them to devote more focused service to patrons.

Polaris integrates effortlessly with your patrons' social media, third-party vendors and external resources empowering your patrons with a richer, more connected experience.
More information

Clarivate
VEGA DISCOVER

Vega Discover, part of the Innovative product family, delivers a modern, intuitive library catalog experience that makes it simple for patrons to search, explore, and connect with resources. Built on BIBFRAME and linked data, it provides a clean, search-engine-like interface enriched with recommendations and related resources that encourage deeper discovery.

Patrons enjoy streamlined search results with work roll-ups that combine all editions and formats into a single record, plus one-click holds and checkouts. A personal bookshelf allows them to save items and searches, manage accounts, and create shareable lists.

Integrated eBook and eAudiobook access, combined with Syndetics Unbound enrichment, transforms browsing into a dynamic, engaging journey.

Libraries can highlight curated collections, programs, and events with customizable homepages, grid views, and visually compelling showcases — whether automatically generated or curated by staff. A responsive design and full compliance with accessibility standards ensure every user has a seamless experience on any device.

By blending intuitive design, powerful

search, and engaging content, Vega Discover helps libraries strengthen visibility, spark curiosity, and deliver a richer connection between patrons and their collections.

collectionHQ
CHQLITE

collectionHQ is the global leading solution for improving library collection performance, utilizing the proven Evidence Based Stock Management (EBSM™) methodology. It is easy to implement, user-friendly, and cost-effective. By offering evidence-based analysis, actionable recommendations, and performance monitoring across all media types, collectionHQ consistently delivers measurable improvements in library collections.

cHQlite is our streamlined version of the collectionHQ platform, designed for public libraries with a limited budget to introduce collection development software. It delivers essential evidence-based insights in a simple, accessible format, helping libraries make data driven decisions. cHQlite boosts collection performance whilst freeing up staff time.

In the past year, cHQlite has introduced powerful upgrades to better understand the collection and what actions to take to improve performance. These enhancements keep cHQlite a fast, intuitive, and cost- effective tool that empowers libraries to make informed decisions and deliver collections that are more relevant and accessible to their communities.

The Crowley Company
CROWLEY MACH MINI FILM SCANNER
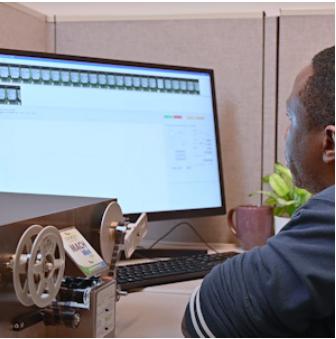

The Crowley MACH Mini Film scanner is a compact, high-performance, production-level microfilm scanner designed specifically for libraries, archives, and institutions with limited space. Engineered with trusted Mekel Technology, the MACH Mini Film delivers fast, high-resolution scans in the smallest footprint in its class, ideal for back rooms, shared workspaces, or mobile setups.

Perfect for preserving local history and improving digital access to legacy collections, the MACH Mini Film is powered by Crowley's proven Quantum Software Suite, which ensures accurate capture and efficient processing. Its user-friendly design makes loading film easy, while a balanced tension system protects fragile or aging microfilm from damage with no pinch rollers required.

An external PC drives the scanner, maximizing uptime and making tech upgrade simple, swapping the PC, not the entire scanner. Each unit is also compatible with Crowley's IMAGEhost platform for secure, web-based access to scanned content.

For libraries looking to modernize access to microfilm collections without sacrificing space, quality, or budget, the MACH Mini Film is a smart, scalable solution.
More information

The Crowley Company
CROWLEY USCAN+ ADVANCED UNIVERSAL FILM SCANNER

Fast and accurate research tools are essential in the library world. The Crowley UScan+ Advanced Universal Film Scanner features an intuitive design and the multi-functional capability of four scanners in one, allowing you to effortlessly scan microfilm, microfiche, aperture cards, and film negatives.

Perfect for libraries, museums, universities, corporate archives, and other organizations, the UScan+ Advanced provides patrons with ease of use, high image quality, and an efficient way to view, capture, save, and share images from various media collections.

To meet diverse patron needs for microform scanning, it includes an adjustable roller that guides and secures the film to prevent damage. The scanner can also learn favorite focus and zoom settings to speed up image access and features a one-click instant capture function to save image frames.

Additionally, the UScan+ Advanced offers a RapidScan software option that automatically advances the film and captures frames as it passes over the camera, making batch scanning a breeze.

The Crowley Company
THE CROWLEY COMPANY DIGITIZATION SERVICES

Digital resources have become increasingly essential for libraries and educational communities. For over 45 years, The Crowley Company has met the imaging needs of librarians and archivists, preserving and capturing a wide range of materials, including legal documents, genealogy research, photos, newspapers, maps, books, microfilm, and other still media.

Crowley's Digitization Services team has been instrumental in keeping libraries connected to valuable research and special collections through high-quality, customizable scanning services. Our efforts have significantly enhanced the preservation of still media and improved public and private access to digital images.

What sets Crowley apart is our unique capability to manufacture, distribute, and utilize our scanners in-house while providing global support. This comprehensive approach allows our team of professionals to effectively understand, adapt to, and address any challenges that arise during the digitization process.

For projects requiring expertise in image quality, diverse media handling, and production efficiency, Crowley's Digitization Services division offers customized digital capture solutions, either at our facility or on-site. No matter the media type or digitization challenge, Crowley is committed to making the process convenient for you.

The Crowley Company
ZEUTSCHEL OS C OVERHEAD & LARGE FORMAT SCANNER
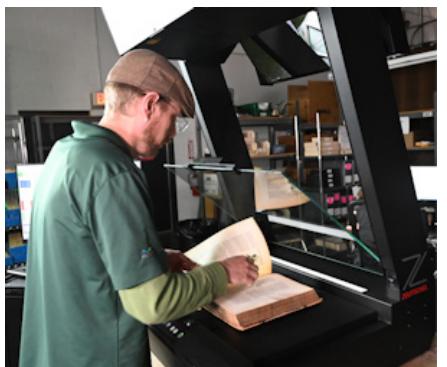

The Zeutschel OS C overhead and large format scanner offers exceptional quality in a compact design, making it perfect for digitization projects of all sizes. This scanner combines the precision of an archival tool with the simplicity of a walk-up scanner, making it ideal for delicate or fragile media collections. With various book holders and cradles, including a V-shaped book holder, you can safely scan bound materials without risking damage to originals.

The OS C captures high-quality images that meet industry standards like FADGI, Metamorfoze Light, and ISO 19264-1 Level B. Its optimized LED lighting and precise movement ensure digital images at resolutions up to 600 dpi, providing clear and accurate results.

Equipped with the OS QM Tool quality analysis software, operators can easily check scan accuracy and compliance in real time, reducing the need for rescans and speeding up workflows. Combined with fast scan speeds and Zeutschel's trusted accessories, the OS C helps complete projects efficiently.

Moreover, the Zeutschel OS C is produced in a climate-neutral manner, is plastic-free, and made from recyclable metals. Its robust construction, including the innovative electro-mechanical glass plate in the OS C Advanced model, guarantees a long service life.

Gale, part of Cengage Group
GALE PRESENTS: EXCEL ADULT HIGH SCHOOL
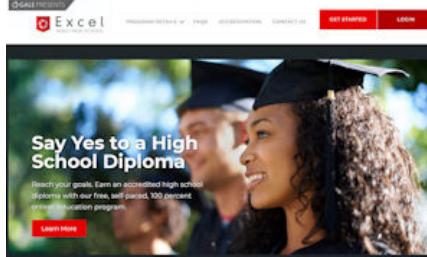

Gale Presents: Excel Adult High School is a 21.5-credit online high school completion program that allows public libraries to offer accredited high school diplomas to adults who wish to prepare for entry into the workforce, further their careers, or attend college.

The curriculum is aligned to national standards and offers more than 100 core academic courses, including 40+ high-interest electives relevant to fast-growing occupations. The intuitive online platform offers 24/7 access, allowing adult students to fit their studies into a busy work/life schedule.

The program is self-paced and can be completed in 24 months or less. Students can transfer previously earned high school, GED®, HiSET®, or TASC credits, which shorten the time to graduate.

Once enrolled, students are paired with a dedicated success coach who helps them stay motivated and provides ongoing support. They also benefit from BRYTE, an AI-powered, on-demand tutoring service, and receive personalized guidance from academic coaches—subject matter experts who support them throughout their learning journey.

For non-native English speakers, there are built-in translation and read-aloud tools. Course content, quizzes, and exams can be translated into more than 150 languages.

Excel High School is accredited by the Cognia Global Commission and has also been granted accreditation from the Middle States Association Commissions on Elementary and Secondary Schools. They are also certified in competency-based education (CBE).
**HEAR FROM THE JUDGES:**
"Excel High School has been very well received by those who have been awarded a scholarship. It is easy to manage. There is a lot of support available to the library and the student."

Gale, part of Cengage Group
GALE PRESENTS: PETERSON'S TEST AND CAREER PREP

Gale Presents: Peterson's Test and Career Prep offers a comprehensive set of tools to support individuals on their educational and professional journeys. Whether for high school students preparing for standardized tests, professionals seeking career changes, or those pursuing further education, the platform provides resources for success.

Users have access to online courses, practice tests, and ebooks covering exams such as the all-online SAT, GMAT, AP exams, U.S. Citizenship, and vocational tests in fields like real estate, law enforcement, and nursing. The platform also helps students and parents explore educational institutions based on preferences, including location, cost, and academic programs. It offers information on scholarships, eligibility requirements, and financial aid support.

A career exploration tool helps users identify suitable career paths through an online quiz, followed by resume-building tools, career advice, and job search options. The platform simplifies resume creation with customizable templates and allows users to search and save job listings.

Peterson's content is regularly updated to include new materials like flashcards, practice tests, and videos. The platform allows users to toggle between English and Spanish, catering to a diverse audience. Learners can set academic and career goals, track progress, and access resources anytime. Account creation is simple, requiring basic information like name and email to get started.

HEAR FROM THE JUDGES:
"We evaluated several other resources, and Gale Presents: Peterson's Test and Career Prep was by far at the top of the list in all the important areas - quality of information, user interface, price, and customer service. Every patron

and stakeholder we've shown it to has been very excited about the depth and breadth of the content."

Gale, part of Cengage Group
GALE PRESENTS: UDEMY
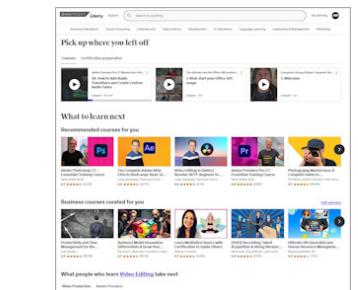

Gale Presents: Udemy is an e-learning/upskilling platform focused on in-demand professional and personal development across 75 categories. From preparing for a CompTIA Security+ exam to mastering ChatGPT, discovering your life purpose, or learning to play the saxophone, Gale Presents: Udemy offers over 30K relevant on-demand video courses for patrons eager to learn a new skill or deepen a personal interest.

A standout feature is its commitment to multilingual content. With 17,000+ courses in languages including Arabic, French, German, Hindi, Indonesian, Italian, Japanese, Mandarin, Polish, Portuguese, Russian, Spanish, and Turkish, the platform offers extensive non-English learning options. As the only library resource delivering virtual skills training by native speakers, Gale Presents: Udemy helps libraries connect with broader, more diverse audiences—breaking language barriers and making learning more accessible.

Udemy's unique content creation model and real-world expert instructors allow it to launch new and updated courses faster than traditional publishers. This ensures libraries can deliver the most relevant, up-to-date information for patrons looking to upskill or reskill. From high school students interested in coding to older adults pivoting careers, every user can find an instructor whose expertise, identity, and teaching style match their learning preferences.

HEAR FROM THE JUDGES:
"This is a great resource and is very popular with our patrons."

Gale, part of Cengage Group
THORNDIKE PRESS YOUTH LARGE PRINT

Youth large print is a format proven to enhance reading skills. A 16-point serif font with expanded spacing between words and one third more spacing between lines provides optimum letter and word recognition. High-contrast black ink and fewer words per page forces the eye to move more slowly, reducing tracking errors and improving reading fluency. Less words per page results in faster page turns, keeping readers engaged and decreasing reading anxiety.

Completely unabridged and always produced with the same cover art and illustrations, Thorndike Press youth large print books look the same as standard print editions. A high-opacity paper and modified dimensions make youth large print books similar in size and weight to standard print editions. Kids who struggle with reading want to read the same books as their peers and youth large print provides that.

Large print is a literacy intervention tool that has the power to enhance your reading program and get kids excited about reading without technology or any additional training of educators.

Based on demand from librarians and educators, Thorndike Press now publishes Spanish-language youth large print to support emerging bilingual students in their language development journey. Offering large print in both English and Spanish improves accessibility, equity and inclusivity for school districts.

HEAR FROM THE JUDGES:
"I once attended a lesson/conference on why large print books should be a thing. I love them."

Huston & Company
CUSTOM LIBRARY FURNITURE

Huston & Company, located in Kennebunkport, Maine, is a premier custom furniture maker specializing in hand-crafted hardwood pieces of exceptional quality and timeless design. With a deep commitment to craftsmanship and sustainability, each piece is built to order using traditional techniques and the finest materials. Known for outstanding customer service, Huston & Company works closely with clients to create furniture that reflects their vision and needs. With a strong reputation for delivering on time and exceeding expectations, they are a trusted name in fine custom furniture.

HEAR FROM THE JUDGES:

" (Our library) enjoys a good long term relationship with relationship with Huston. ... Their work is quality that will be on our campus 100 years from now. Their work is superior - and they are wonderful to work with. They ensure that every detail is as it should be. They are also great about following up if something is not correct. I would absolutely endorse them for an award, of craft, customer service and quality.

OPENATHENS COMPASS

OpenAthens develops and supports remote access for library resources. Our flagship solution, OpenAthens Compass, provides a complete solution that combines federated and proxy authentication for digital resources. This single-sign-on solution ensures secure access to digital resources anytime, anywhere, so users no longer need to remember multiple passwords or navigate complicated login processes.

We pioneered this authentication method and continue leading in secure access. Our platform protects user privacy with no personally identifiable information released by default.

Librarians maintain complete control over resource access based on licenses and user groups. They benefit from usage statistics that provide insights into subscription value and tangible evidence of usage. As a fully managed service, our dedicated account managers provide personalized support tailored to each institution's unique needs.

Founded at the University of Bath in 1995, OpenAthens supports over 8 million users across 3,500+ organizations worldwide. We continue to innovate by listening to customers and working with our experienced technical team.

Our customers rated us 4.4/5 for service and 4.78/5 overall in 2024-25. This recognition illustrates our values: Make

OpenAthens Compass

Single login. Total access. Endless possibilities.

Compass delivers secure, seamless access for complex organizations - built for librarians and trusted by institutions worldwide.

Eight years of Platinum. One trusted solution.

⊕ **Discover OpenAthens Compass**

2026 MODERN LIBRARY AWARDS

Academic & Library Furniture Custom Built to Last

Creating environments where communities can educate, explore, come together and move forward.

it simple. Be of service. Lead the way. OpenAthens continues to help people access knowledge when and where they want it, on campus or remote.

HEAR FROM THE JUDGES:

" OpenAthens has been essential to our library's ability to manage authentication and authorization. The admin suite offers sophistication and granularity of control, allowing me to accommodate user groups with different permissions and vendors that require IP and other oddities. ...

The reports tool gives me easy access to usage patterns and the ability to filter by any of the user attributes my institution has opted to include ... while at the same time protecting user privacy by limiting the set of attributes delivered to vendors.

Finally, and most importantly, OpenAthens enables us to deliver single-sign-on smoothly and hassle free for our users.

Whether they start at our library website or a Google Scholar search, users can quickly access the full content we subscribe to, often without the need to re-enter credentials.

Since our migration from [another product] to OpenAthens, our users report far fewer authentication problems. OpenAthens truly is the best-in-class authentication service for libraries.

More information

LaptopsAnytime
AUTOMATED LAPTOP (AND TABLET AND PORTABLE 110V POWER CHARGER) DISPENSING CHECKOUT KIOSKS

LaptopsAnytime's innovations include configurable automated checkout kiosks (12-, 18-, 24- or 30-bays per system) that dispense a wide range of laptops (i.e. from Dell, HP, Lenovo, Apple, Google), tablets (e.g. iPads) and 110V portable power chargers on-demand to library patrons, recharge devices, automatically return devices back to pre-set image, integration to/with library ILS and/or LDAP/Active Directory databases, email notifications and full suite of inventory management, audit trail and management reporting functionality. Plus, users can also add access to BRAINY AI.

Up to 30 devices in 5 feet: Laptops, tablets and/or power chargers separated by row! Do you want to move beyond desktops with smart automated dispensing kiosks? Until recently, desktop labs were the king of open access computing and all the rage. Big, boxy machines that sat on or under rows of desks but were stationary and posed problems as seating could only accommodate desktop users. By transitioning to automated dis-

pensing kiosks, libraries/universities can put in seating for all and reclaim their space...moving away from desktops to a more flexible, comfortable cafe-like environment. And circulation counters can be freed up for librarians to help with info needs, not hand out laptops like robots. Transform your facility by replacing desktops with a practical, space-saving, self-service solution. Replace 20 desktops and reclaim 150 sq ft. and lower your power usage by 90% in the process.

HEAR FROM THE JUDGES:

" We have been very satisfied with LaptopsAnytime. Their system provides the flexibility needed to meet library patrons' user needs.

More information

LEID Products
SMARTAXESS™ LIBRARY LOCKER SYSTEMS

SmartAxess™ Library Locker Systems, powered by LEID Products, enable libraries to provide patrons uninterrupt-

ed and private 24/7 "no touch" service outdoors or indoors, with a variety of fully Americans with Disabilities Act (ADA) compliant sizes, configurations and custom colors.

Patrons can retrieve their requested library books by passing a library card under the bar code reader. The system recognizes the patron and opens the correct locker door or doors revealing books and materials. Patrons can also enter their library card number or transaction code on the 10" LCD screen via finger touch or by using the corner of a plastic card, pen, or pencil. Once materials are retrieved, the system immediately sends a message to staff that the locker is now available for new materials and another patron.

SmartAxess Electronic Library Lockers are modular and can be configured to meet the specific requirements of a library's remote locations and come in pass-thru (built into the library facade) or stand-alone (remote) designs. A 6-time consecutive MLA Platinum winner, LEID Products is responding to the needs of libraries everywhere.

Benefits include:
• ADA Compliance with 24" ground clearance
• Easy to clean and keep sanitized for patrons and library staff
• Made in the USA — no tariffs and no supply chain challenges
• Proven and reliable for outdoor use
• Lowest 5-year cost of ownership in the industry
• No annual software fees

HEAR FROM THE JUDGES:

" Vendor was great to work with and has provided continued great support. Patrons value this service -- staple of our offerings. Very low maintenance and easy to train staff and patrons operate. Very glad we purchased our lockers and added this to our library.

OPALS
MEDIA FLEX – OPALS

OPALS is a library automation, digital information and assets management system. The system is used by school, academic, public and special libraries to manage print, digital information subscription databases, STEM kits, music scores, Chromebooks, calculators, and cameras. Applications include standards-based cataloging, circulation, advance booking - order processing - and scheduled deliveries, single sign-on authentication, and resource sharing (interlibrary loan). Integrated portal utilities enable librarians to develop custom library websites without having to use third party services. Support services include hosting, customer support, professional development and training.
HEAR FROM THE JUDGES:

❝ I have worked with several library automation systems and OPACS over the years, and often still have to use other services while dealing with public libraries and college libraries. OPALS by Media Flex is, by far, the best! Easy to learn, easy to use, excellent quality, excellent service. They've been our district's OPAC since August of 2009. I can't say enough good about them. They make my job and my students' learning So Much More User Friendly.

BESTMARC
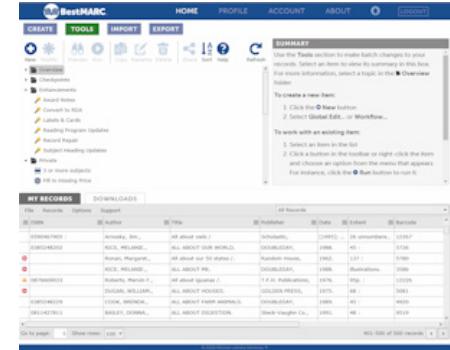

Investing in your MARC records pays off—let BestMARC show you how!

Your MARC Records are more than metadata, they're the key to unlocking discovery, access, and circulation in your library. With fully updated MARC records, patrons can find exactly what they're looking for, no materials left behind. That's where BestMARC comes in – the cloud-based data solution that puts you in control.

Accuracy That Builds Trust: BestMARC ensures your authority and bibliographic records are accurate and aligned with industry standards. Say goodbye to inconsistencies and errors—your catalog will reflect the professionalism your patrons expect.

Efficiency that saves time: Seamlessly transition between bibliographic and authority records. Create global edits, build workflows that include subject updates, RDA conversions, and more—all in one place.

Discoverability that drives engagement: BestMARC boosts discoverability by supporting enriched authority and bibliographic records. Clearer access points make research easier, while diverse vocabulary and inclusive subject terms (DEI-focused) help match patrons' language and interests—leading to increased circulation and satisfaction.

Beyond editing: Simplify record creation, import/export, and error detection. Locate elusive records with z39.50 search.

AnalyzeMARC—Your free diagnostic tool: Get a deep dive into catalog health. Identify call number issues, syntax errors, brief or duplicate records, and more.

Playgarden Prep
PLAYGARDEN ONLINE

Playgarden Online is a high-quality virtual preschool program designed for families who cannot access or afford in-person centers. Unlike most virtual options for children under 5 that rely on games and animation, Playgarden features engaging lessons taught by real teachers, using the same proven curriculum from our in-person schools. Our whole-child approach nurtures academic growth in math, reading, writing, and science while fostering social-emotional skills, nutrition awareness, sensory exploration, and creativity. Flexible and easy to access, Playgarden empowers libraries to offer patrons an affordable, high-quality preschool option, eliminating barriers to early education and addressing the needs of communities in preschool and early childhood education deserts. Librarians can also use Playgarden for in-person early literacy programming, adding expert instruction to storytimes, playdates, or activity sessions. Families can use it as a full homeschool preschool or as an enriching supplement, inspiring a lifelong love of learning from the very start.

ScannX, Inc.
SCANNX OS2500, OS2800V, AND OS4800V OVERHEAD SCANNERS

The ScannX OS2500, OS2800V, and OS4800V overhead scanners, powered by ScannX software, are the industry's first sub-$5,000 overhead scanners designed for library patrons and staff. The ScannX overhead scanners range in image quality from 275 dpi up to 470 dpi optical resolution, and up to 600 dpi interpolated resolution. The ScannX overhead scanners are powerful A3, color, digitization tools recognized for its ease of use, image quality, and advanced capabilities. Its patented page flattening technology, and digitization and ILL tools are comparable to the quality and features found in book scanners twice its price. The OS2800V and OS4800V include a V-shaped cradle for delicate books.

The ScannX overhead scanners are designed to allow the book to lie face up and capture the full image of the 2 pages without distortion. The ScannX software converts scanned files to over 10 different file formats, which can then be sent to over 25 destinations without re-scanning; removes thumb images automatically; and offers auto-scan to increase productivity. Advanced tools for digitization and ILL projects include scanning from left-to-right/right-to-left; single scan conversion to dual file formats; and integration with Microsoft Edge for unmatched security in scanning to the cloud.

ScannX Cloud Services (SCS) tracks usage, push updates, enable features and manage warranty renewals. SCS options include faxing, translation and handwriting recognition services. ScannX provides remote support via email, telephone and remote access with its U.S. based support team.

PATRON POINT

Patron Point is the leading patron relationship management platform purpose-built for public libraries. It brings together data from across your library

ecosystem, including the ILS, eBook platforms, event and room booking systems, databases, and website, to create a unified view of each patron's engagement.

With this data, libraries can effortlessly segment audiences and deliver personalized, timely, and targeted communications across email and web channels to:
- Boost collection usage, program attendance, and volunteer involvement
- Deliver a more personalized digital patron experience
- Better target and evolve library offerings

Make marketing more engaging, automated, and cost-effective

Libraries can hit the ground running with a suite of Proven Programs™—including automated welcome messages, card renewal prompts, and win-back campaigns—or design custom workflows tailored to their community's unique needs.

The integrated Patron Point Verify™ feature streamlines card registration and renewal with robust online address verification, making it simple for residents to become patrons from the comfort of home.

Our Recommends™ (powered by ProQuest) and My Reads™ (powered by Brodart) services enable libraries to deliver stunning, library-branded reading recommendation newsletters, driving engagement and circulation that are fully automated.

Patron Point also has fully optional built-in AI-powered tools to support librarians with intelligent features like optimized email send times and auto-generated subject lines, maximizing email visibility and impact while saving staff time.

Taylor & Francis
EUROPA WORLD

Europa World is a meticulously researched global resource. It provides political, economic and statistical information on over 250 countries, territories, and on international and regional organizations. The Europa World Year Book was first published in 1926 and, together with nine Regional Surveys of the World, is renowned as one of the world's leading reference works.

Key features:
- Authoritative information on every country, providing context for the world's major political and economic developments

- Up-to-date government lists and recent election results for every country in the world
- The ability to directly compare national statistics in graph and tabular form
- Coverage of 2,000 international organizations, commissions, and specialized bodies
- Topical essays and commodity overviews for major regions of the world
- Current and comprehensive statistical and directory data for all countries and territories
- Impartial coverage of issues of national and regional importance from acknowledged experts
- A directory of major political figures with biographical information and facts
- Sophisticated search and browse functions allow enhanced accessibility to data-rich content
- Access via institutional IP, EZproxy, Shibboleth and OpenAthens

More information

Tech Logic Corporation
TOTALAMH
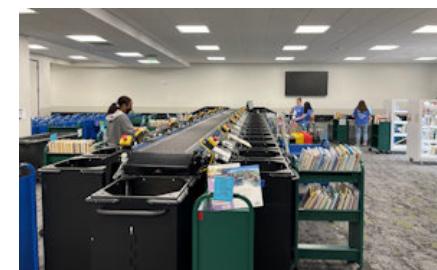

Tech Logic's automated material handling (AMH) system, totalAMH, optimizes item induction, check-in, and sorting with design principles that have been tested and refined for more than 25 years.

With Tech Logic's totalAMH system, patrons and staff simply place items into the system and then walk away. No manual check-in is required. To protect the user's experience, unreadable items are NOT rejected—rather, these items are sorted to a designated bin for staff to investigate at THEIR convenience. We believe this is much better than forcing users to endure one-at-a-time processing and, even worse, forcing patrons to deal with rejected items at the return.

Immediately after items are returned by patrons or inducted by staff, the to-

talAMH system automatically separates stacked items. Then, the system uses RFID and/or barcode technology that is built into the conveyance—as well as real-time connection to the library's ILS—to identify items, check them in, and sort them based on ILS directives and the library's selected sorting strategies.

Because of the totalAMH system's quality components and amazing support team, our systems are known to serve their libraries for many years past competitor system lifespans. Each totalAMH—from the smallest system to the largest central sorter—is custom-designed, built, tested, delivered, and supported from our headquarters in Oakdale, MN.

HEAR FROM THE JUDGES:

" Our library system's experience with Tech Logic's AMH equipment has been extremely positive. The machine(s) are well-made, functional, and aesthetically pleasing to the eye (compared to other systems we have seen). We have patrons who love to watch the machines in action. Tech Logic did a wonderful job adapting and integrating their AMH systems to fit in our existing buildings. They have continually provided

high level, responsive customer service over the many years we have had their AMH systems in our buildings. Installing Tech 1. Logic's AMH equipment has made many of our processes more efficient, allowing us to reallocate staff to more public facing community focused activities. We could not be more pleased with our decision to purchase our Tech Logic AMH system.

" We looked at several vendors for AMH and found Tech Logic to be the solution that addressed our needs in the most complete way. They tend to be more expensive than others, but when making a big long term investment the additional cost was worth it. Not just their technology but their hands on responsiveness with training and maintenance is outstanding.

More information

The Library Corporation (TLC)
LS2 PAC (LIBRARY•SOLUTION)
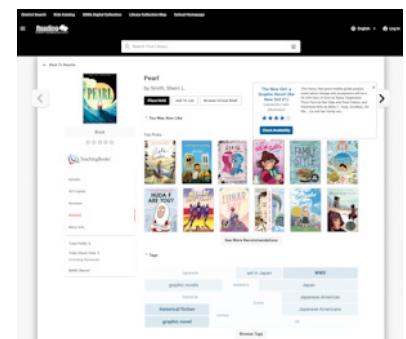

Library•Solution's user-friendly, intuitive library catalog — LS2 PAC — is designed for all users across public libraries and school libraries. Its interface reflects popular website design, featuring user reviews, ratings, tags, e-book integration, database integration, and faceted navigation. Enhanced content options provide cover art, professional reviews, "look inside," book profiles, about the author, alternative formats, series details, and more. Integrations with vendors like StackMap and TeachingBooks also create more opportunities for patrons to engage with library resources.

For staff, LS2 PAC makes it easy to promote collections and events, as well as customize colors, logos, header text, and links — library by library. In 2025, version 5.8 significantly advanced WCAG 2.1 AA compliance and accessibility for users, including built-in guardrails for contrast on color selection.

HEAR FROM THE JUDGES:

" From the lens of public school library services, we have been under the microscope on transparency and doing work that focuses on what is best for kids. This political environment has created a false narrative, and TLC has worked alongside our school district to ensure that at every turn, we are prepared. TLC's communication is far beyond reproach. I have been supported in my district by the same TLC team for over five years. We feel as though they truly understand the way our organization works. As a result there is no wasted time on explaining circumstances or history on the why, instead we get right to work, finding solutions or working together on new projects. Hands down, the most responsive company I have ever worked with. The name of the game in public schools is collaboration, and TLC takes that to heart. We may be two different organizations, but we are on the same team. They are AMAZING.

Today's Business Solutions Inc.
EPRINTIT SAAS

ePRINTit SaaS CLOUD PRINTING

Built on the AWS platform, ePRINTit SaaS (Serverless Platform) enables users to print documents, emails, pictures, and web content easily and securely from any Internet-enabled device, smartphone, tablet, laptop, or desktop computer to your library's existing printers. Print jobs can be submitted both on-site and off-site.

ePRINTit SaaS also enables customers to easily brand the User Interface with their colors and logos, along with processing print jobs faster and more securely.

ePRINTit SaaS [Serverless] delivers a scalable, high-performing solution with auto-scaling and elastic load balancing. It also scales up or down based on demand to ensure ePRINTit SaaS will have access to processing and storage resources when needed. This ensures our customers have flexible, reliable, high-performance, and secure mobile print solutions.

Why serverless?
• No server management
• Continuous scaling
• Built-in fault tolerance

Easy to use
Deliver the latest services and technology to your community. ePRINTit SaaS enables users to print from the library, home, office, or while on the go, using Android, iOS, or any web browser to print to their library.
• Use a library card to submit and retrieve print jobs
• Guest printing made easy
• Optional email or text confirmation of print job
• Multiple print jobs in a single submission
• Submit jobs from anywhere

SCANEZ SCAN STATION

COPY | SCAN | PRINT | FAX ScanEZ

The new TBS ScanEZ simple scan station allows patrons to scan to smart devices, email, USBs, printers, fax, Box, Dropbox, OneDrive, Google Docs, and more. Standard scanning file formats include Doc, JPG, PNG, TIFF, GIF, PDF, searchable PDF, PDF/A and more.

New image enhancement functionality revives old photos and documents by analyzing the sharpness, contrast, color, and saturation on the fly to give the patron a revived image or document and restore memories that could have been lost.

A multilingual interface that allows users to switch on-screen text to one of 25 different languages, and a Multilingual translation service to translate scanned text from one language to one of 60 supported languages. Translated files are sent to the user as a Microsoft Word file and a subset of languages for MP3 audio files, with a constantly growing catalog of languages.

ABBYY® Fine Reader OCR for unmatched optical character recognition and accuracy for searchable PDFs and Word documents, with 192 languages standard for OCR multilingual capabilities.

Accessibility features make it easy for the visually impaired and blind to use the station with a magnifier, narrator and high-contrast scheme.

Today's Business Solutions Inc.
TBS KIOSK
The TBS 9900 series Payment Kiosks offer a comprehensive transaction experience, enabling users to print,

PAYMENT KIOSKS PCI COMPLIANT SOLUTION END-TO-END

copy, scan, and fax using various payment methods.

These include coins, bills, major credit/debit cards (via swipe or chip), and NFC technology such as HID, Apple Pay, Android Pay, and other forms of NFC payments.

Simplify your payment process for prints, copies, scans, and faxes through a unified user interface.

The TBS 9900 Payment Kiosk series features a reduced footprint. This print release system does not require a computer for print release or large cabinets, maximizing valuable floor space. The kiosks offer coin, bill and credit card payment options, along with a CPad device that controls access and enforces payment for copy, print, scan, and fax services, all from a single vending device. The kiosk is sturdy and wears well in a public use environment with clean cable management. Giving patrons with a single user interface to conduct their transactions simplifies the entire process.

These units feature a secure PCI-compliant credit card terminal. Credit card transactions are processed securely over a cellular network at a low micro-transaction rate per swipe, with no minimum fees. Each terminal supports EMV Chip, Swipe, NFC (Apple Pay, Android Pay and more).

Optional upgrades include a high-capacity coin tube and bill recycler that returns change in both coin and bill denominations, allowing users to utilize larger bill denominations without depleting the tower. This system automatically replenishes itself with coins and bills, eliminating the need for staff to constantly refill the kiosk with coins and bills.

Audit receipts can be printed from the TBS Payment Kiosk to reconcile funds and to account for all financial activity conducted at each kiosk, as well as providing centralized reporting for verification of activity.
More information

Transparent Language, Inc.
TRANSPARENT LANGUAGE ONLINE

Transparent Language Online provides digital learning materials in 140+ languages, including English for speakers of 30+ other languages, 20+ indigenous languages, and American Sign Language.

There's something to suit every age and interest, including "KidSpeak" for K-2 learners, elementary courses for grades 3-5, "Teen Voices" for middle and high schoolers, the travel-focused "Essentials" course for adventurers, and business-focused vocabulary lessons for professionals. Every course builds their vocabulary and provides opportunities to practice the four core skills: listening, speaking, reading, and writing.

Learners can also customize their experience with additional resources like alphabet courses for non-Latin languages, a grammar reference with written and video explanations, and a vocabulary review system to help them retain what they learn. To stay on track, learners can set a daily learning goal in Transparent Language Online, and log time towards that goal anytime, anywhere, on almost any computer, phone, or tablet.

HEAR FROM THE JUDGES:

❝ This is the third language product we have tried. The experience with the Transparent Languages has really felt like a team effort. They work at making the product a fit for library patrons and staff alike. They go the extra mile to support their product with marketing and support.

❝ The Transparent Language team is very responsive. When we have mentioned a language need in our community, they have been able to add language lessons for that language and help provide marketing materials to ensure those resources can be found!

More information

Tutor.com
TUTOR.COM

Tutor.com — the longest continuous provider of online tutoring programs to public libraries and their patrons — has been providing its services for more than 25+ years and 28M+ sessions. These include virtual on-demand and prescheduled live tutoring and homework help in more than 200+ subjects, including AP® and IB, drop-off writing review, and support for jobseekers. Our solution features an interactive classroom equipped with a whiteboard, graphing calculator, and more, as well as Text Chat and two-way voice options for learners of all ages. We also offer asynchronous support and a range of complementary services, including test prep resources from The Princeton Review®.

We began offering our services initially in collaboration with public libraries. The goal was to facilitate equitable access to tutoring for students from all socioeconomic backgrounds throughout the U.S. Through a public library, students would be able to virtually connect with an expert Tutor.com tutor, regardless of location, and without the need for an appointment.

Current library clients include the Los Angeles Public Library, which serves the largest and most diverse population of any library in the U.S. We also support several state library systems, including Alabama, Alaska, Louisiana, Rhode Island, South Carolina, and West Virginia.

HEAR FROM THE JUDGES:

❝ Tutor.com is one of my organization's most utilized digital resources. Because it is a statewide program in a state with many remote and rural communities and widespread low income, free and accessible tutoring for all ages is invaluable for our residents. The 12-hour window for live tutoring and the asynchronous tutoring option are especially appreciated

for improving accessibility to this product. Lastly, my contacts at Tutor.com are helpful, responsive, and wonderful!

GOLD AWARD

COMPanion Corporation
ALEXANDRIA®
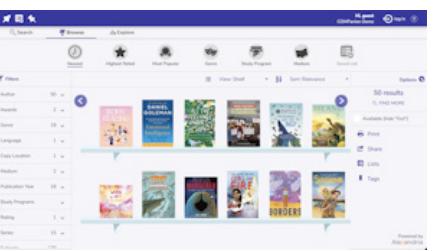

Alexandria™ Library Automation builds and promotes library advocacy, making your library the heart of the learning experience by focusing on 4 key areas: Equitable Access, Discoverability & Engagement, 3rd-Party Integrations, and Adoption & Support. This exclusive solution puts more resources in your students' hands, delivers a true one-size-fits-me experience, increases engagement and circulation, and puts more time in your hands to focus on what matters most, improving student outcomes.

Alexandria™ is more than just library circulation software. It is a tool that helps connect educators to students, and students to curriculum. Alexandria will maximize the investment you have made in your collection in the following ways:

Equitable access and delivery: All patrons have equal access to the resources your library has to offer; regardless of age, ability, learning style, technology limitations, etc.

Engagement and discoverability: Tools and interfaces designed to help patrons of all ages and grade levels discover what they need.

Partnerships and integrations: Connect various EdTech solutions to save time and leverage resources.

Adoption and success fidelity: Our commitment to your success is apparent in all of the resources we provide from monthly webinars to our 24/7 live customer support.

Your library will feel truly limitless!

Library Systems & Services
LS&S MANAGED SERVICES

As one of the nation's largest systems of public libraries, Library Systems and Services (LS&S) delivers library excellence. A trusted partner to communities across the country for over four decades, LS&S provides an alternative service delivery model that maximizes library value and drives efficiency, yielding significant benefits for all stakeholders. LS&S collaborates with communities to create exceptional library services backed by the support and strength of library and information professionals with expertise and current, everyday experience. As a valued partner to public and federal libraries and information centers of all sizes, LS&S focuses on developing a one-of-a-kind managed services plan to strategically address each library's challenges and enhance services to meet and exceed patron and community needs. By emphasizing stronger library service at a lower cost and meeting current and future library needs, LS&S drives real impact to communities.

More information

OCLC
CLOUDLIBRARY

CloudLibrary™ provides access to a rich collection of digital content, including millions of ebooks and audiobooks as well as tens of thousands of digital magazines, newspapers, comics, graphic novels, manga, movies, and TV series all in one app saving time and budget.

CloudLibrary's unique content sharing program, CloudLink™, is a budget-friendly way to expand the breadth and depth of your ebook and audiobook collection. Increase circulation of lesser-used titles and decrease hold times on popular materials by working with other CloudLink libraries in your state.

The enhanced web portal makes it easy for staff to manage the library's ebook and audiobook collection. A spotlight page includes latest additions to curated lists where you scroll through cover images or search for titles to add to your collection.

With CloudLibrary, your library users have unlimited, simultaneous access to digital magazines, comics, and movies, with no holds or waits.

Comics Plus® allows library users to experience a robust collection of digital comics, manga, and picture books.

CloudLibrary NewsStand™ offers access to thousands of digital magazine and newspaper titles in 60 languages.

Our video platform provides an ad-free streaming service with thousands of movies and TV series on all devices, including smart TVs, streaming sticks, and mobile devices.

HEAR FROM THE JUDGES:

❝ Moving to CloudLibrary was a great decision for our library. Being connected to CloudLink has allowed us to substantially increase our e-collection which is a huge benefit to our patrons. I have been extremely pleased with this product and would not go back to the competitor.

❝ My library has been a CloudLibrary customer since 2012, as an early adopter of their ebook platform, back when they were 3M! Since then, we have added audiobooks, comics, and NewsStand. CloudLibrary continues to strive for quality and responsiveness, with good customer service. We're also a member of a large CloudLink group in our state. The CloudLink feature is incredibly beneficial to libraries seeking to make their budget stretch further and for patrons seeking a larger variety of titles and shorter wait times for high-demand titles. We are a happy CloudLibrary customer!!

More information

ScannX, Inc.
SCANNX BOOK SCANCENTER BOOK-EDGE SCANNER

ScannX is the leading developer of book-edge scanning solutions for library patrons and staff. Its innovative software incorporates ease-of-use, reliability, security, accessibility, device monitoring and measurement, and IT productivity tools. With only 3% of the 270 million pages scanned going to print, libraries are saving paper and toner costs while saving trees.

The scanner's patented book-edge design protects the book spine from damage. Its intuitive interface guides users through the scanning process including choosing file format, image quality, file name and scan-to destinations. The system automatically crops, straightens and orients pages with text. Its "Accessibility" features guide visually impaired users through the scanning process. ScannX systems connect to various coin, bill and credit card payment systems for cost recovery.

Scan books into PDF, searchable PDF, Word and MP3 file formats. Email scanned files automatically or send them to USB drive, smartphones, tablets, network folders, printers, and fax, ScannX offers OCLC certified software connectors to Rapido, Tipasa, WorldShare, Article Exchange, ILLiad.

ScannX Cloud Services (SCS) ensures the highest levels of security and reliability to track usage, push updates, enable features and manage warranty renewals. SCS offerings include faxing, translation and handwriting recognition services.

ConverSight.ai Inc
MYLIBRO

myLIBRO is an all-in-one mobile platform that empowers libraries to deliver services seamlessly, improve efficiency, and deepen community engagement. Fully integrated with a library's ILS, myLIBRO allows patrons to search the catalog by author, title, subject, or keyword, reserve and renew materials, access eBooks and audiobooks, and schedule appointments or pickups. With optional features like self-checkout and reading challenge management, myLIBRO makes using the library easier than ever.

myLIBRO enables library staff to easily manage library operations with full account management capabilities, 24/7 availability, and e-resource visibility. It streamlines requests management, resource reservations, and curbside pickups. The platform also integrates event calendars, notifications, and custom messaging, helping libraries better market their programs and increase attendance. By providing one easy-to-use app for every library need, myLIBRO ensures patrons remain connected, engaged, and supported, while libraries maximize resources and expand their community reach.

Today's Business Solutions Inc.
MYPC WITH EASYBOOKING & PAPERCUT FOR COMPUTER RESERVATION & PRINT MANAGEMENT

TBS's computer time management, MyPC, offers unrestricted methods of reservations — walk-up, guaranteed bookings, and queue-based. (Queued patrons get text messages when their reservation is available.)

TBS ILS SmartConnect checks the entire patron record, making decisions on rules priority or simultaneous rules and groups users by specific rules or profiles.

Central server management (which runs as a service) and a Staff Portal with browser-based connectivity, a centralized dashboard to manage print, guest passes, patron re-printing and staff release of patron print jobs.

The MyPC portal features a single view of computer areas, locations, or buildings in the system allowing staff to perform daily functions from anywhere. MyPC integrates with PaperCut and both are compatible with Windows and Mac on an SQL platform for cumulative statistical reporting.

The new feature, Preparation Time for MyPC – Due to the recent global pandemic, we have added new optional functionality to MyPC. PrepTime is set at the Location Policy Level and allows you to define a time in minutes before and/or after a patron uses a PC for staff to clean the screen, keyboard, mouse, desk, and surfaces around the MyPC-controlled PC.

PaperCut offers anonymous printing and automatic login. Real-time fleet management lets IT oversee all output devices and vending kiosks from any location. Features standard windows printing. Centrally submitted print jobs can be released anywhere within the system for Follow-Me printing.
